

Flexline User Journey

1. Website/Landing Page
2. Onboarding - NDAJ/LOS
3. Portal Access
4. Add a Bank Account
5. Request a Draw
6. Repayment
7. Notifications

Website/Landing Page

1. Website design on webflow where the user can fill basic details and get access to NDAJ/LOS login immediately with a pre-approval limit displayed
2. Form details:
 - a. Full name
 - b. Company Name
 - c. Company Industry
 - d. Company Type (Private/Public/Sole Proprietor)?
 - e. Revenue (min and max options, drop down)
 - f. Company Country (only US allowed, can be default selection)
 - g. Business Email
 - h. Phone Number
 - i. Role at the company
3. Once the user fills this form, a pre-approved tentative limit is generated. This limit is based ONLY on the revenue bracket selected by the user. The same will be boldly mentioned to the user.
4. A modal will pop-up showing the limit and a CTA "Get Started/Complete Onboarding." Once the user can click on the CTA, they will be re-directed to NDAJ with the above fields pre-filled and will be asked to complete their onboarding journey to confirm their limit.
5. Buyer will then be underwritten and if approved, a limit will be provided. Negotiation?
6. Legal documents E-sign

Onboarding

Current NDAJ requires customer to fill the following:

1. Business details
2. Personal details and identity verification
3. Connect Plaid or add bank statements
4. Upload financial documents
5. Consent, review and submit
6. Once the user does complete the journey, the details move to under writing. If any additional documents are needed, the same should be communicated through the NDAJ and user should be able upload additional docs even after submitting the form.
7. Once it is approved and limit is assigned, user is notified. They can accept or negotiate. Should negotiation be possible in all cases?
8. Once limit is accepted, they e-sign the legal agreement and are directed to the portal. The email ID and password remain the same.

Onboarding

Dashboard

1. User logs in the dashboard and can see the following:
 - a. Available and utilized credit limit
 - b. Add a bank account
 - i. CTA to begin add bank account flow
 - c. Request a draw CTA
 - i. Redirect to request a draw flow
 - d. Recent 5 transactions
 - i. CTAs for each transaction view
 - e. Notifications
 - f. Chatbot/FAQs

Add a bank account

1. Once the user logs in, user needs to add a new bank account for their Flexline transactions. The option to select from the existing bank account(s) added on NDAJ should also be there.
 - a. Add new bank account details:
 - i. Account holder company name (as shown in bank statements)

- ii. Bank Name
- iii. ABA Routing Number (9 digit only)
- iv. Account Number
- v. Currency (USD only)
- vi. Account Type (Checking or Savings)
- b. Once the user adds a bank account, the status will be “Verification Pending.”
- c. Define bank verification flow.
- d. Once the bank is verified, the status moves to “Verified.”

Request a draw

1. The user can request a draw by clicking on the “Request a Draw” CTA.
 - a. Once the user clicks on this CTA, a new page opens up with a form that consists of the following fields:
 - i. Draw amount
 - ii. Repayment timelines (3 months or 6 months)
 - iii. Preferred installment date (1st or 15th of every month)
 - iv. Bank account (for credit and repayment debit) (can only select verified bank accounts)
 - b. The interest calculation should happen realtime as and when the user enters the amount and selects the repayment time.
 - c. Once the user clicks on submit, the user is redirected to the draw page. This is the individual transaction/draw page for each draw.

Transactions Page

1. The transaction history page will have a table of all the draws and their details. Draw details are:
 - a. Transaction ID
 - b. Transaction type - Credit request or Repayment
 - c. Transaction amount
 - d. Transaction date and time
 - e. Transaction bank selected
 - f. Transaction status
 - g. View Transaction
 - h. Downloads

2. The transactions page will also have a CTA to request a draw.

Individual Transaction Page (V2)

1. Transaction ID as heading
2. Transaction Amount
3. Transaction Bank
4. Repayment structure with interest calculations
5. Repayment due dates
6. CTA to repay now through Dwolla
